

PROFUSION **YOUR MOBILITY**

Whether you are defense or teleco or any organization that requires to move/roam around some of its infrastructure, from one place to another, with Profusion, this mobility can be done at the room level, container level or even cabinet/rack level. Just put your IT infrastructure in Profusions and you can stack them on need basis, even unplug and move your entire investment with you wherever you need to

go. By Profusioning your mobility, you basically advance your mobility capabilities and shed redundant costs and unnecessary resources that you typically have to consume in traditional rooms, hot-aisle, cold-aisle containments, or any other sort of cabinet architecture screws your investment and mobility to floors, containers or shelters.

PROFUSION **YOUR MOBILITY**
